**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Bernadette McGann on 29-Jan-10.

The application has been amended as follows:

**Claim 10:**

Please change "The two-component curable composition," as found on line 1 of claim 10 to --The two-component curable composition of claim 2,--.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: Applicants amendments to independent claim 2 necessitate the withdrawal of the previously relied upon prior art rejection to Okamoto et al. (WO-03/11978). Specifically, independent claim 2 now requires from 0.2 to 6 parts by weight of a tetravalent organo-tin condensation catalyst. Such catalysts are expressly avoided by Okamoto et al. (1:54-2:49). In fact, Okamoto et al. teaches the use of non-tin based curing catalysts (3:45-65) and employs an organotin catalyst only in Comparative examples. Therefore, a person having ordinary skill in the art would not have considered employing the now claimed tin catalysts since doing so would directly contradict the teachings presented in Okamoto et al. Last, those comparative examples which do teach the use

Art Unit: 1796

of organotin catalysts do not teach all of the claimed ingredients of the instant claims and would require substantial deviation in order to arrive at the instant claims. Okamoto et al. is believed to represent the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
